Introduction & Background

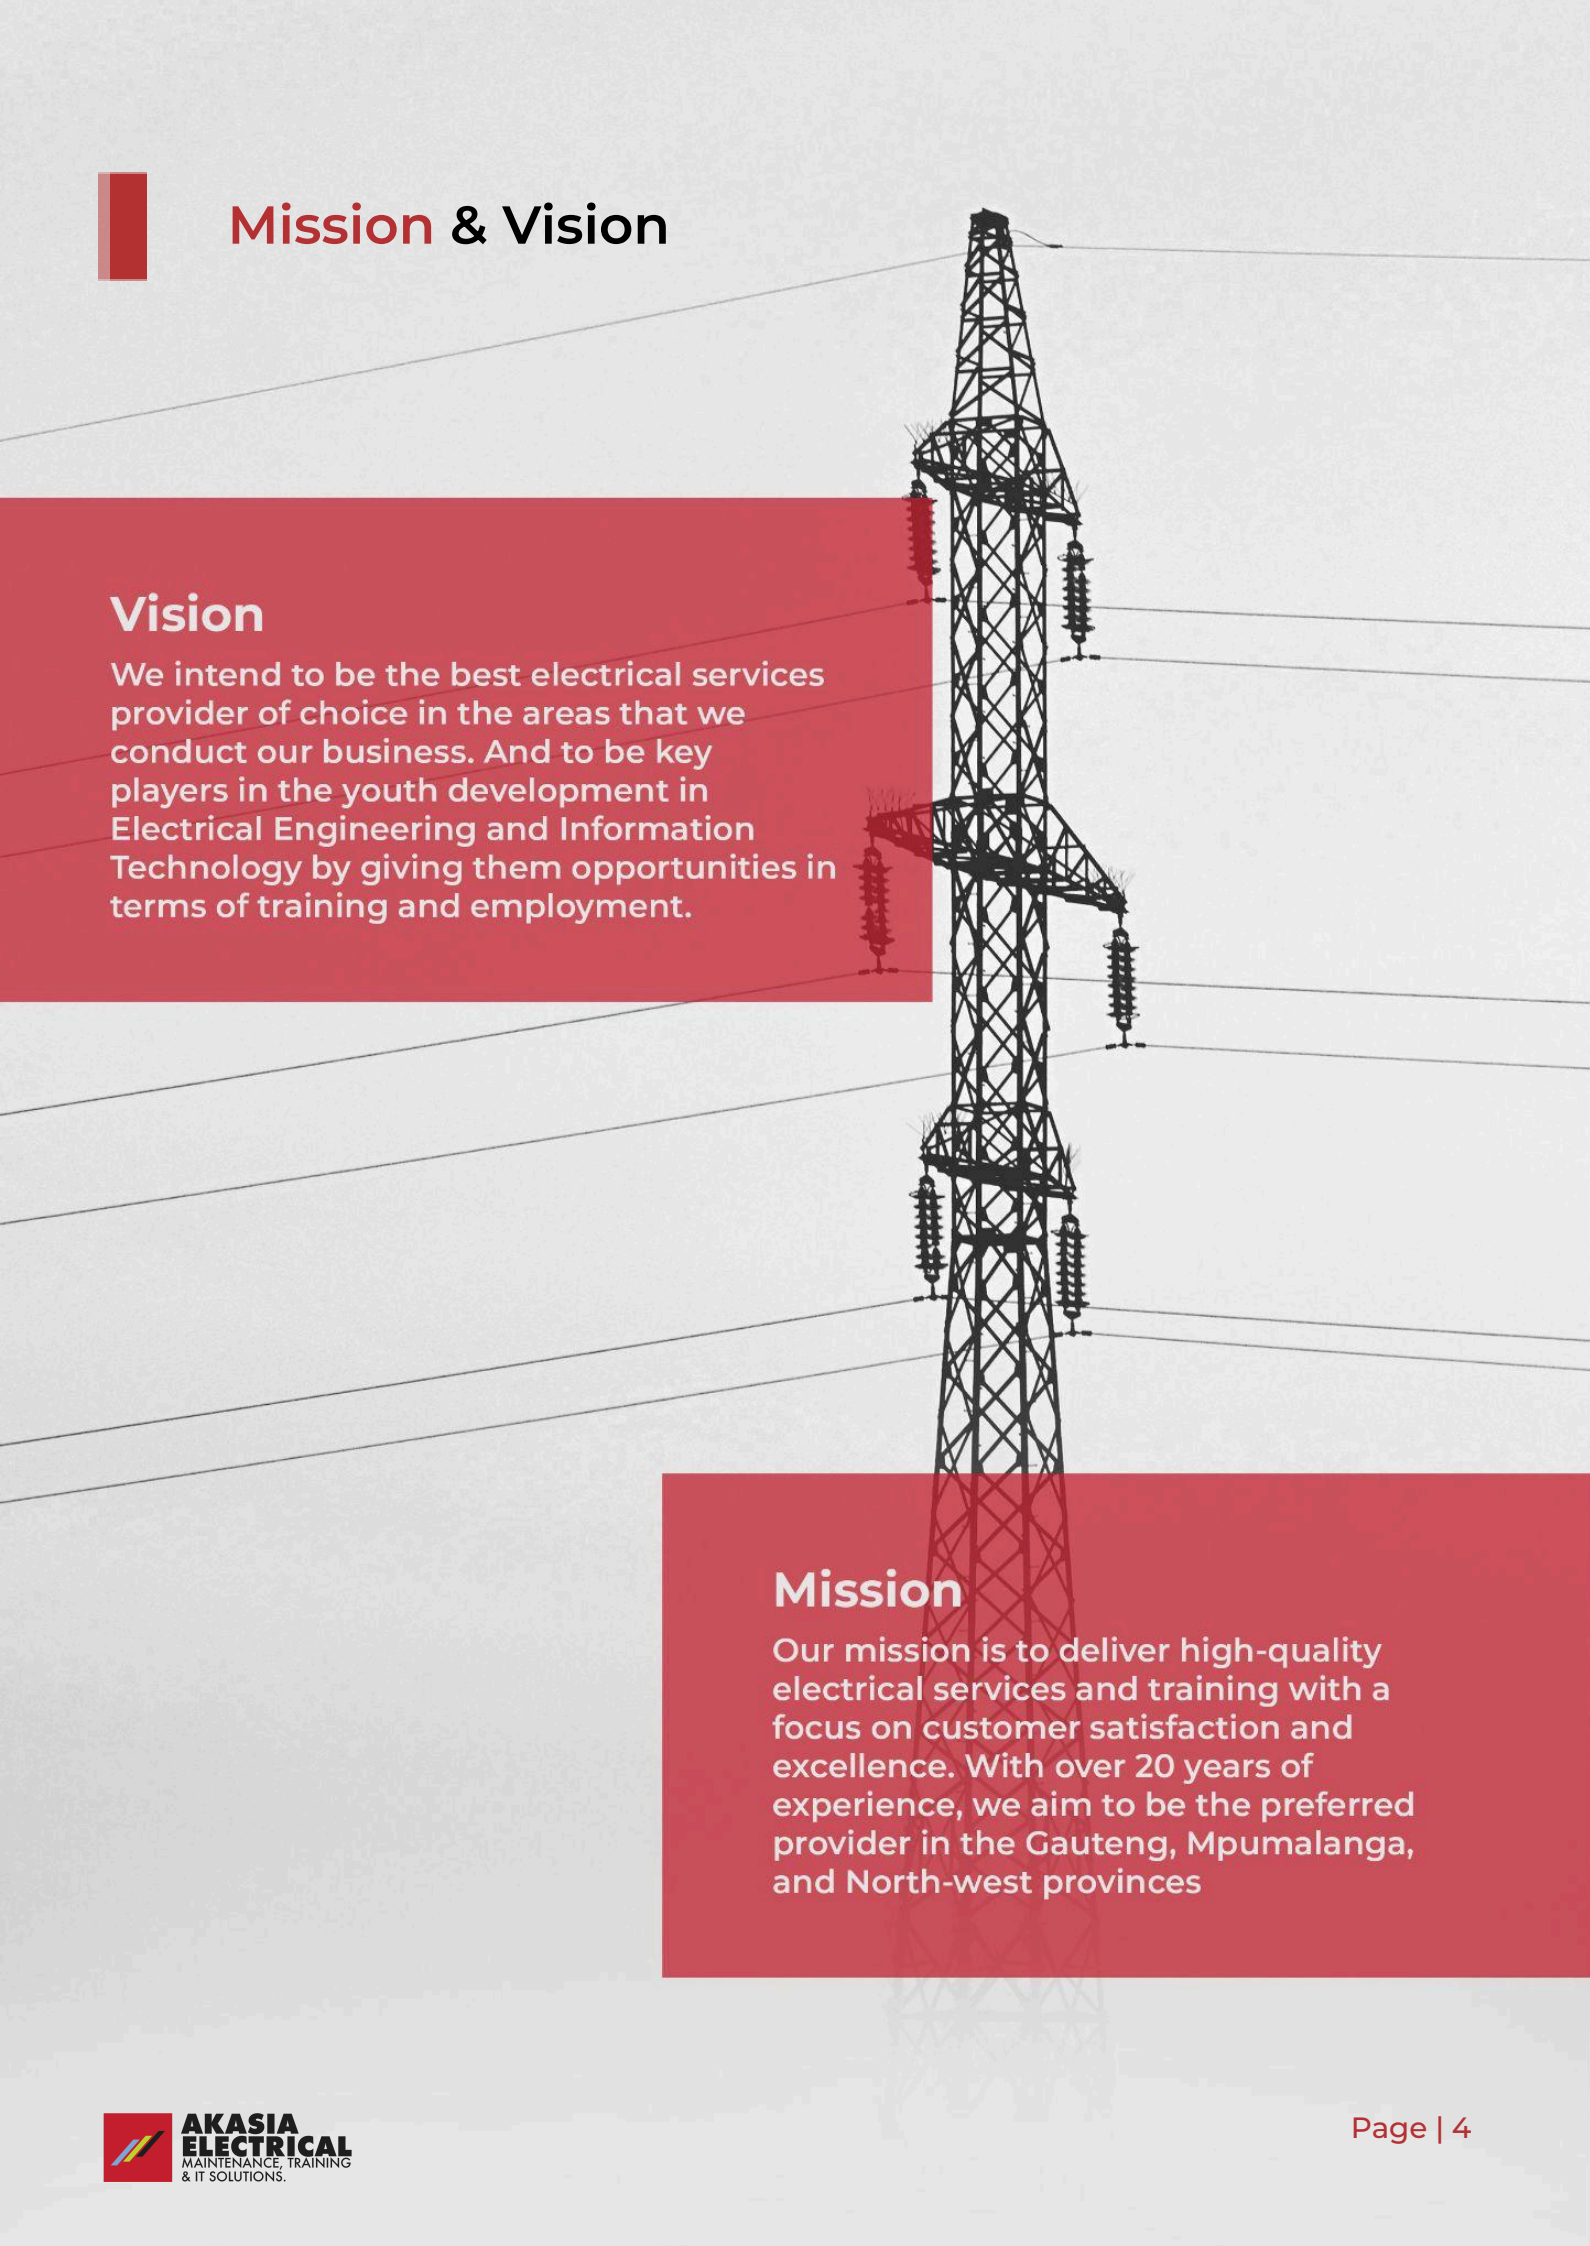

At Akasia Electrical Maintenance, Training & IT Solutions, we are dedicated to providing top-notch electrical services and training to our customers. With over 20 years of experience in the electrical field, we have established ourselves as a reputable and reliable company in Gauteng, Mpumalanga, North-West and beyond.

Our team of highly skilled electricians is committed to delivering high-quality services that meet the needs and expectations of our customers. Whether you require electrical installations, maintenance, repairs, or training, we have the expertise and knowledge to get the job done right the first time.

We understand the importance of customer satisfaction, which is why we strive to go above and beyond to exceed our customers' expectations. Our dedication to quality and excellence is evident in every project we undertake, and we take pride in the positive feedback and repeat business we receive from our satisfied customers.

At AEMT, we believe in continuous improvement and staying at the forefront of advancements in the electrical industry. That is why we invest in ongoing training and development for our team, ensuring they are equipped with the latest skills and knowledge to provide the best service possible.

Mission & Vision

Vision

We intend to be the best electrical services provider of choice in the areas that we conduct our business. And to be key players in the youth development in Electrical Engineering and Information Technology by giving them opportunities in terms of training and employment.

Mission

Our mission is to deliver high-quality electrical services and training with a focus on customer satisfaction and excellence. With over 20 years of experience, we aim to be the preferred provider in the Gauteng, Mpumalanga, and North-west provinces

Our Expertise

AEMT is a trusted provider of expert electrical services for both residential and commercial customers. With a wealth of experience and expertise, we specialise in delivering top-notch electrical installation, alterations, and maintenance services tailored to meet the unique needs of each type of customer.

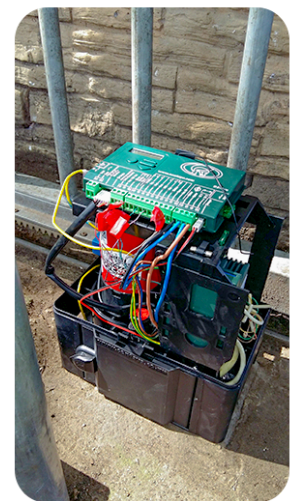

Serving Residential Customers

For residential clients, we understand the importance of a safe and functional electrical system in your home. Our skilled electricians are equipped to handle a variety of residential electrical needs, from installing new fixtures to troubleshooting electrical issues and carrying out routine maintenance to ensure the safety and integrity of your home's electrical system.

Serving Commercial Customers

For commercial customers, we recognize the critical role that reliable and efficient electrical systems play in the success of your business. Our team is well-versed in commercial electrical solutions, whether you need to upgrade your lighting to improve energy efficiency, rewire your office space to accommodate new technology, or perform regular maintenance to keep your operations running smoothly.

Our Team

Jacob Mpete is the owner and managing director of our organisation, with over 20 years of experience as an electrical technician, he has performed maintenance, installation, repair, commissioning, and inspection of electrical equipment and systems for a paper mill plant - Neopak, one of the leading paper manufacturers in South Africa. He has also worked as a manufacturing controller and trainee, running and operating different sections of the paper machine, ensuring quality and minimizing waste.

He has a strong background in electrical engineering and information systems, with a BCom Hon in Information Systems from UNISA, a National N Diploma in Electrical Engineering Heavy Current from Tshwane South College, and a Wiremans Licence from the Department of Labour. He possesses skills in electrical wiring, electrical equipment, electrical controls, PLC, VSDs, soft starters, JDE systems, root cause analysis, and quality control. He has demonstrated leadership, teamwork, problem-solving, and safety skills, acting as a team leader, participating in health and safety committee meetings, and performing root cause analysis on critical failures.
